

# MUHAMMAD ZAIN IRFAN

## MERN Stack Developer

Lahore, Pakistan | zainirfan4162@gmail.com | 0324-4299870

[LinkedIn: /in/zainirfan](#) | [GitHub: /ZainIrfan03](#)

### PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-style applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing RESTful APIs, integrating frontend and backend services, and implementing authentication with JWT and session-based systems. Comfortable with Git/GitHub, Agile workflows, and writing clean, maintainable code. Seeking a MERN Stack Developer Internship to contribute to real client projects while continuing to grow as an engineer.

### TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful API design, JWT Authentication, Passport.js
- **Database:** MongoDB, Mongoose, MySQL, SQL fundamentals
- **Tools:** Git, GitHub, Docker, Postman, Socket.IO, WebRTC
- **Practices:** MVC Architecture, Agile/Scrum basics, REST API integration, debugging & code review

### TECHNICAL EXPERIENCE

#### IFFA Tech — Full Stack Developer (Project-Based) | 3 Months

##### Wanderlust – Full-Stack Travel Listing Platform (MVC, Node.js, Express, MongoDB)

[View on GitHub](#)

- Built full CRUD functionality for travel listings with a review system using nested routes.
- Implemented secure authentication and authorization using Passport.js and Express sessions.
- Followed MVC architecture with EJS views, EJS-Mate layouts, and Joi request validation; prepared Cloudinary integration for image uploads.

##### Real-Time Video Conferencing Platform (React, WebRTC, Node.js, Socket.IO)

[View on GitHub](#)

- Built a peer-to-peer audio/video conferencing app using WebRTC (RTCPeerConnection, SDP, ICE).
- Implemented a Socket.IO signaling server for offer/answer exchange and ICE negotiation.
- Developed a multi-user React conference view with screen sharing, mute/camera toggle, real-time chat, and media stream fallback handling.

##### Stock Trading & Portfolio Management Platform (MERN Stack)

[View on GitHub](#)

- Developed a full-stack trading dashboard using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT authentication with cookie-based sessions and protected routes.
- Designed and consumed RESTful APIs with Mongoose schemas to manage user holdings and positions.
- Integrated frontend and backend using React Router, CORS, and environment variables with a modular, reusable component architecture.

### EDUCATION

#### Bachelor of Science (BS), Computer Science — University of Education | Lahore, Pakistan

CGPA: 3.51 | Expected Sep 2027 (In Progress)

#### FSc, Pre-Engineering — Government College of Science | Lahore, Pakistan | 2021–2023

Grade: A+

### CERTIFICATIONS

- Knowledge Gate — JavaScript, React and Redux Toolkit

### INTERESTS

- Interests: Real-time systems, scalable backend architecture, database design and performance optimization
